

**Chandler Crossing Homeowners Association  
Flagpole Policy  
Adopted July, 2002**

Homeowners are encouraged to fly the American flag from a home-mounted bracket. Architectural Committee approval is not required for home-mounted bracket use.

Should you elect to place a flagpole on your property, you must adhere to the following requirements. Please remember that the standard flag size is 3 x 5 feet; 2 x 3 foot flags are also available.

1. An architectural submittal should always be completed and submitted in advance to the property manager for approval by the Architectural Committee.
2. In general, flagpoles should not exceed 15 feet height above ground. Exceptions will be made depending on the architecture of the home.
3. Flagpoles should only be placed in the front yard.
4. Flagpoles should be placed at least 10 feet from sidewalks so as not to endanger children running or bicycling on sidewalks.
5. Flagpoles should be constructed to withstand the high winds of monsoon season, retain their appearance under Arizona weather conditions, and be easily removable should the pole become damaged or its appearance deteriorate.
6. Only the American flag may be flown.
7. Size of the flag may not exceed 3X5 feet.

Regardless of how you choose to fly your flag, please adhere to proper flag-flying etiquette. Flag etiquette is available on the Chandler Crossing Web site at [chandlercrossinghoa.com](http://chandlercrossinghoa.com).
